

Amendments to the Specification

Please replace the paragraph beginning at page 10, lines 3 through 13 with the following rewritten paragraph:

62
– Referring first to **Figure 1**, there is depicted a graphical representation of a data processing system **8**, which may be utilized to implement the present invention. As may be seen, data processing system **8** may include a plurality of networks, such as Local Area Networks (LAN), Local Area Network1 10 and Local Area Network2 32, each of which preferably includes a plurality of individual computers **12**, **121**, **122**, and 123, and ~~30~~ 31, 33, 35, and 37, respectively. Of course, those skilled in the art will appreciate that a plurality of Intelligent Work Stations (IWS) coupled to a host processor may be utilized for each such network. Each said network may also consist of a plurality of processors coupled via a communications medium, such as shared memory, shared storage, or an interconnection network. As is common in such data processing systems, each individual computer may be coupled to a storage device **14**, **141**, **142**, and **143**, and/or a printer/output device **16**, **161**, and **162**, and may be provided with a pointing device such as a mouse **17**.--
